Recommendations for consistent use

Purpose, personality & positioning

Built for a brighter tomorrow.

Ideas. Products. **People.**

Modern

Thoughtful

Approachable

Recommendation: DrixelOne brings ideas, products and people together through clear, purposeful digital experiences.

TONE OF VOICE & MESSAGING

Say it clearly. Make it human.

Our voice is direct, helpful, and human. We earn trust by making complex things feel clear and achievable.

RECOMMENDATION

Clear — make the next step obvious.

RECOMMENDATION

Thoughtful — explain the why, not just the what.

RECOMMENDATION

Confident — be decisive without being loud.

Approved logo variations

Primary lockup – light field

Primary lockup – dark field

Horizontal lockup

Symbol – light field

Symbol – dark field

Use the original asset that provides sufficient contrast for the background.

RECOMMENDATIONS

Clear space & minimum size

CLEAR SPACE DIAGRAM

Recommended
minimum digital width:
120 px
for the full lockup

Recommended
minimum print width:
28mm
for the full lockup

Symbol-only mark:
use when the full
lockup would become
unclear.

 Recommendations: test legibility at final size.

LOGO SYSTEM

Protect the mark. Respect the space.

Use the supplied lockups as complete assets. Keep geometry, overlap, colour and letter forms intact.

USE / CLEAR AND CALM

Give the logo a quiet field and generous separation.

AVOID / COMPETING CONTENT

Never place text or graphics across the mark.

Keep proportions

Scale the complete lockup uniformly. Never stretch, rotate, skew, rearrange or rebuild the wordmark.

Keep the overlap

Preserve the distinctive intersection between the D and O. Do not recolour or add effects to solve visibility.

Choose the right variant

Use the matching light or dark asset. Keep busy imagery away from the logo.

Check the smallest use

Follow the recommended starting sizes on page 6, then test at actual output size.

COLOUR SYSTEM

Violet leads. Neutrals support.

Recommended layout colours, aligned with the supplied book. Preserve the original colour treatment inside each logo asset.

CORE VIOLET

#7B50FF

RGB 123 / 80 / 255

Emphasis, actions and key details

INK

#151F28

RGB 21 / 31 / 40

WHITE

#FFFFFF

RGB 255 / 255 / 255

LAVENDER

#CDBCFC

RGB 205 / 188 / 246

PALE LILAC

#EEE8FC

RGB 238 / 232 / 252

Use neutrals for most of a layout. Add violet for focus and lavender for atmosphere. These are layout recommendations, not replacement logo colour values.

COLOUR SYSTEM

Make every word readable.

Calculated contrast for the exact flat colours below. Gradients, transparency and photography need their own checks.

Aa**Body copy**

#151F28 on #FFFFFF

Aa**Violet actions**

#FFFFFF on #7B50FF

Aa**Dark supporting text**

#EEE8FC on #151F28

Aa**Violet on pale lilac**

#7B50FF on #EEE8FC

Working target: at least 4.5:1 for normal text and 3:1 for large text. Never communicate a status through colour alone.

TYPOGRAPHY

A consistent voice.

A clear hierarchy

Recommended families: DM Sans & Garet, already present in the opening pages.
Use DM sans for headings and Garet for reading text.

DM SANS / BOLD

Built for a brighter tomorrow.

Garet

Our voice is direct, helpful and human.

Use one family consistently across new material. Keep the original wordmark as artwork; typography rules do not apply to the logo.

Weight

Headings: Bold 700. Body: Regular 400.
Use a medium weight sparingly for labels and emphasis.

Fallback

If DM Sans is unavailable in a working file, use a clean sans serif fallback, then restore the brand family before release.

TYPOGRAPHY

Let the hierarchy do the work.

Title

36-44 pt / short, deliberate lines

Section heading

20-26 pt / one clear topic

Body text

11-13 pt / line height 1.4-1.5

CAPTION / LABEL

8-10 pt / brief supporting detail

A4 STARTING GRID: 18-22 MM MARGINS / CONSISTENT GUTTERS

Left-align paragraphs. Keep line lengths comfortable, use consistent spacing and give each page one dominant idea. Keep footnotes readable at the final export size.

GRAPHIC ELEMENTS

Simple forms.

Distinctive rhythm.

Use circles, open rings and purposeful overlaps to echo the supplied identity without turning them into alternative logos.

Scale and crop

Use oversized forms at the page edge. Let one main gesture define the composition.

Keep the reading area calm

Place text on a clean field. Decorative shapes should guide attention without competing with content.

Use effects sparingly

A subtle gradient can add depth to a background. Keep the logo untouched and avoid heavy glow.

Make a repeatable system

Repeat the same colour relationships, ring weights and corner treatment across related pieces.

GRAPHIC ELEMENTS

Show the work.

Keep it human.

Choose purposeful product imagery, authentic working moments and clear details. Use visuals that explain what people can do.

ILLUSTRATIVE PRODUCT INTERFACE

Product images

Use real, current screenshots when available. Remove sensitive information. Label invented interfaces as concepts.

Photography

Choose natural light, simple framing and credible people or environments. Avoid generic robots and staged handshake imagery.

ONE CONSISTENT OUTLINE STYLE

LIGHT & DARK SYSTEMS

Space to think. Clarity to act.

Use light layouts for documents, proposals and information-rich product experiences.

IDEAS. PRODUCTS. PEOPLE.

A clearer way to move forward.

Bring structure to the next idea.

Explore the work

Surface and type

White or pale lilac canvas. Ink for main text. Violet for clear actions, key phrases and details.

Logo and decoration

Use the light logo asset. Keep shapes at the edge and leave the content grid clear.

LIGHT & DARK SYSTEMS

A bold opening. A calm presence.

Use dark layouts for hero moments, title slides and focused announcements.

Built for a brighter tomorrow.

Start a conversation

Readable contrast

White for primary text. Lavender for supporting detail. Keep long paragraphs off saturated violet.

Match the source asset

Use the supplied dark logo on a compatible dark field. Do not invert or recolour the light artwork.

APPLICATIONS

A simple first impression.

Keep the front expressive and there verse useful. These flat mockups show hierarchy and placement.

CONTACT DETAILS ARE PLACEHOLDERS / REPLACE BEFORE USE

APPLICATIONS

One post. One clear message.

Design for a small screen. Keep headlines short and use the same recurring visual language.

Use a repeatable hierarchy

Logo first, one main idea, one next step. Keep supporting copy outside the visual when space is tight.

Adapt for each placement

Recompose for square, portrait and story formats. Check platform crops and leave room around essential content.

Concept examples only. Replace copy with real announcements and add accessible captions before publishing.

APPLICATIONS

Lead with value. Make action obvious.

A conceptual home page direction using the book's light visual system. It does not imply a live product or confirmed offering.

Navigation and interaction

Use plain labels, clear focus states and familiar interaction patterns. Keep the primary action easy to recognise.

Content and evidence

Explain the value in real terms. Use genuine work, accurate capabilities and approved customer evidence.

APPLICATIONS

Make the story easy to follow.

SECTION / THE OPPORTUNITY

Start with the need.

State the problem clearly.
Show why it matters.
Explain the next step.

SECTION / THE APPROACH

Discover

Design

Build

Use a strong opener, quiet content slides and a clear closing request. Prefer real evidence, diagrams and examples over dense bullet lists.

APPLICATIONS

Small details. A consistent voice.

Use concise, readable correspondence with a compact signature. Keep contact information accurate and easy to copy.

Hello,

Thank you for the conversation. Here is the agreed next step and the information you need to move forward.

Kind regards,

+27 XX XXX XXXX

Keep it useful

Use real text for the person's name and contact details. Add a descriptive link and logo alternative text where supported.

Keep it compact

Avoid large banners, decorative quotes and unnecessary social icons. Test in common email clients and on mobile.

PLACEHOLDER CONTACT DETAILS / REPLACE BEFORE USE

QUICK REFERENCE

Before it leaves the team.

1 Logo

Original asset, correct background, uniform scaling and clear space.

2 Colour

Use the recommended layout palette; preserve embedded logo colours.

3 Type

Consistent family, clear hierarchy and readable text at final size.

4 Layout

Shared alignment, generous margins and restrained decoration.

5 Voice

Direct, helpful and human. Verify every factual claim.

6 Applications

Replace placeholders. Check crops, links, contact details and export quality.

Recommended assets to keep together: original logo masters, transparent PNG exports, approved fonts and colours, reusable layouts and the latest dated brand book.

Ideas.
Products.
People.

Built for a brighter tomorrow.

Create with care. Keep the identity clear.
Make every expression feel like DrixelOne.
